Volume 21

Structured Literacy Grounded in the Science of Reading

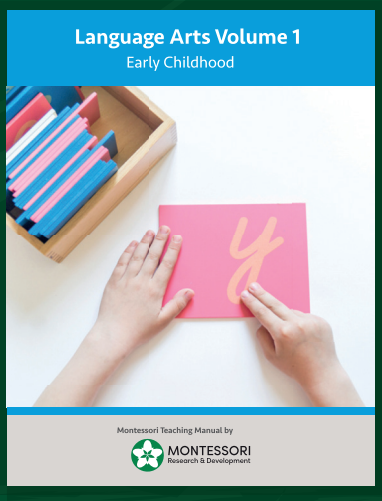

Pink Series

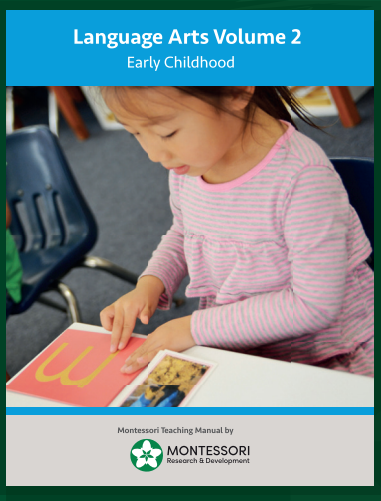

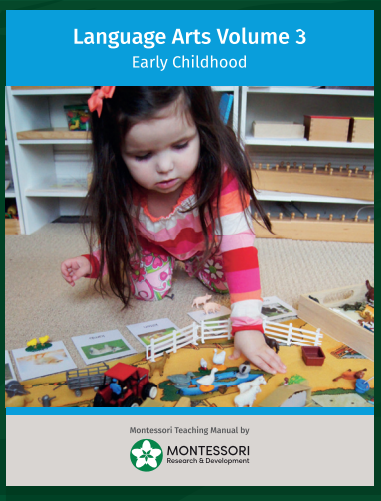

Blue Series

Green Series

From a child's first sounds to fluent, independent reading, our *Early Childhood Teaching Manuals* guide teachers through every step of the *Pink*, *Blue*, and *Green Series*

MONTESSORI
Research & Development

Our Commitment to Evidence Based Literacy

Early Childhood Science of Reading

Learning to read requires intentional, well-sequenced instruction rooted in how the brain develops language. Our *Early Childhood Language Arts* teaching manuals combine research based methods with hands-on card materials to create a complete phonics and language arts program.

Language Arts Teaching Manuals

Volume 1: Listening & Speaking
Builds the phonemic awareness and oral language foundation

Volume 2: Writing & Reading
Complete phonics program structured along a continuum of linguistic hierarchy

Volume 3: Grammar
Develops vocabulary and language comprehension

Writing – Reading Curriculum Materials

- **Pink Series**
  Introduction to Phonetic Writing and Reading
- **Lilac Series**
  Sight Words and Reading Fluency
- **Blue Series**
  Consonant Blends and Sentence Writing and Reading
- **Green Series**
  Phonograms and Expanded Writing and Reading Skills

Montessori Rating Scales Early Childhood

Objective, reliable measurement tools for Montessori early childhood programs & classrooms

Environment

A statistically rigorous tool that objectively evaluates the completeness and quality of the Montessori prepared environment for children ages two and a half to six.

Quality Principles

Evaluates whether teachers are conducting the classroom in accordance with established Montessori principles, practices, and outcomes.

Intended for:

School administrators
Environmental assessment, staff development, and accreditation preparation

Teacher education centers
Practicum site placement and candidate assessment

State and federal agencies
Evaluating Montessori early childhood classrooms for funding and compliance

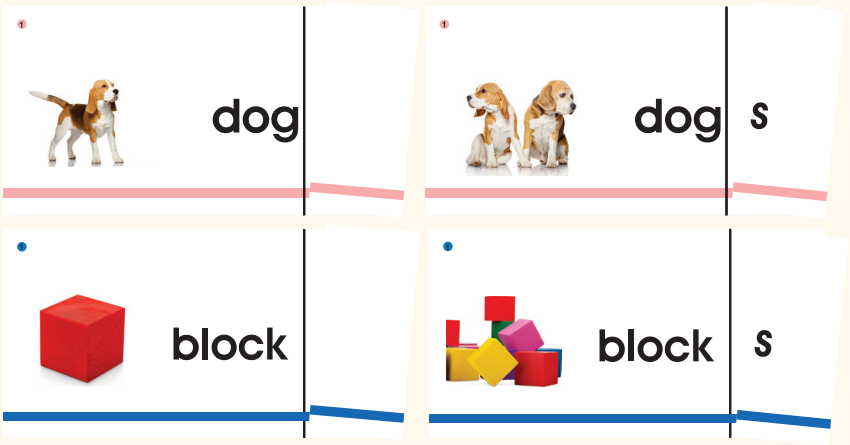

Montessori consultants
Supporting school improvement recommendations

Common Core State Standards - The Montessori Way

Concept development activities add deeper meaning to language.

Categorization is one of the most sophisticated of concepts to develop. Piaget focused on categorization, explaining that we organize thoughts and behaviors into systems through a categorization process.

Categorization activities fill the Montessori curriculum: living/nonliving; plant/animal; vertebrate/invertebrate; parts of the plant that we eat; transportation by air, by land, and by water.

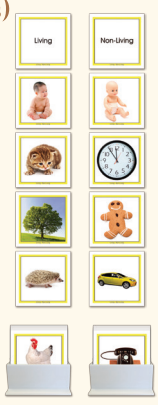

Here are the ready-made materials to complete the Montessori curriculum and insure categorization activities for your children.

Living · Non-Living

Parts depicted in both Early Childhood and Elementary:

Set #1

- Skeletal System
- Axial Skeleton
- Cranium
- Neurocranium
- Visceral Cranium
- Vertebral Column
- Cervical Vertebrae
- Thoracic Vertebrae
- Lumbar Vertebrae
- Sacrum
- Coccyx
- Rib Cage
- Sternum
- Ribs
- True Ribs
- False Ribs
- Floating Ribs

Set #2

- Appendicular Skeleton
- Shoulder Girdle
- Clavicles
- Scapulae
- Humeri
- Forearms
- Ulnae
- Radii
- Wrist Bones
- Hand Bones
- Metacarpals
- Proximal Phalanges
- Middle Phalanges
- Distal Phalanges

Set #3

- Appendicular Skeleton
- Pelvic Girdle
- Ilia
- Ischia
- Pubes
- Femora
- Patellas
- Lower Legs
- Fibulas
- Tibias
- Ankle Bones
- Foot Bones
- Metatarsals
- Proximal Phalanges
- Middle Phalanges
- Distal Phalanges

Set #4

- Joints
- Fixed Joint
- Partial Movement Joint
- Synovial Joint
- Hinge Joint
- Pivot Joint
- Saddle Joint
- Condyloid Joint
- Ball and Socket Joint
- The Gliding Joint

Money Curriculum

The money curriculum is sold as a complete set. Full Color
- Printed on plastic • Ready to Cut • Total of Plastic Coins:
- 400 – one cent coins • 50 – five cent coins • 100 ten cent coins
- 10 – twenty five cent coins • 100 one dollar bills • 100 ten dollar bills

Money Curriculum manual inlcuded

$222.00

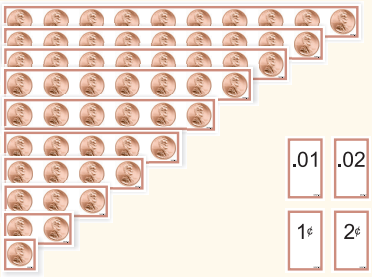

MNP.01-10

Printed on plastic

Money – Number Rods

2 sets – Number Rods
- 1 set – heads – (shown)
- 1 set – tails – (not shown)

2 set of Numeral Cards & Shopping Cards
- 1 set – with ¢ symbols
- 1 set – with decimal symbols

20 Shopping Cards

1¢ – 10¢ .01 – .10

Number Rods, Numeral Cards w/ Shopping Cards

Ten coin-rods with quantities of one to ten coins are like the Montessori number rods. Two sets allow the child focus on the obverse (heads) side of the coin, and the reverse (tails) side of the coin.

A set of numeral cards introduces the child to the "cent" sign: "¢." A second set of numeral cards introduces the child to representing money quantity 1 – 10 with decimals.

The child then matches the coin rods to the money symbols.

The Shopping Cards provide the child the opportunity to match the correct coin rod to the Shopping Card. Marketplace relevance is immediately introduced!

Money – Spindle Boxes

2 sets of Spindle Boxes & Shopping Cards
- 1 set – with ¢ symbol
- 1 set – with decimal point

Plastic coins for both Spindle Boxes sets.
- 90 – one cent coins
- 10 – five cent coins (for exchange)

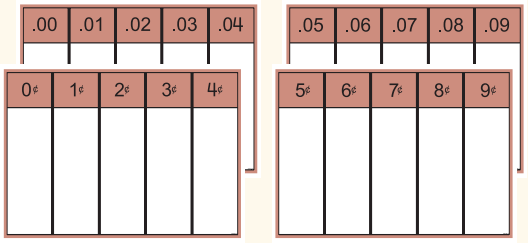

18 Shopping Cards

1¢ – 9¢

.01 – .09

Spindle Boxes, 1¢ and 5¢ coins w/ Shopping Cards

Two sets of spindle boxes provide both cent symbols and decimal symbols for representing Money quantity. Plastic cents are counted out in the same manner that spindles are used with the Montessori math: the child must make the sets from loose quantity.

The Shopping Cards provide the child the opportunity to count out the correct coins for the Shopping Card. Marketplace relevance is immediately introduced!

The five cent coin is introduced. The child experiences the Shopping Cards using the 5 cent coin when relevant.

Money – Numerals & Counters

2 sets of Numerals & Shopping Cards
- 1 set – with ¢ symbol
- 1 set – with decimal point

Plastic coins for both Numeral sets.
- 110 – one cent coins
- 12 – five cent coins (for exchange)
- 2 – ten cent coins (for exchange)

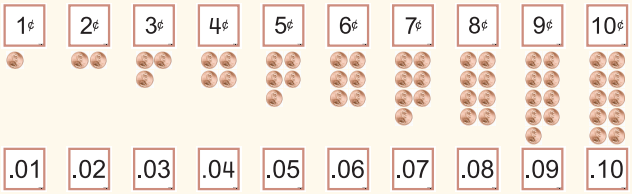

20 Shopping Cards

1¢ – 10¢

.01 – .10

Numerals & Counters, 1¢, 5¢ and 10¢ coins w/Shopping Cards

Two sets of numeral cards provide both cent symbols and decimal symbols for representing Money quantity. Plastic one-cent, five-cent and ten-cent coins are counted out in the same manner that counters are used with the Montessori math: the child must make the sets from loose quantity.

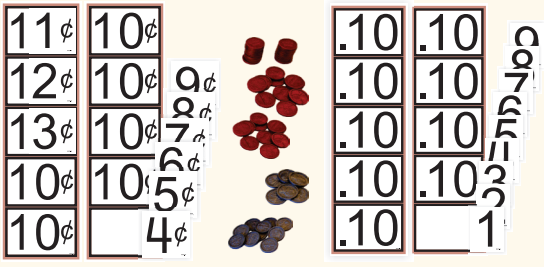

The Shopping Cards provide the child the opportunity to count out the correct coins for the Shopping Card. Marketplace relevance is immediately introduced!

The ten cent coin is introduced.

Money – Teen Board

2 sets of Teen Boards & Shopping Cards
- 1 set – with ¢ symbol
- 1 set – with decimal point

Plastic coins for both Teen Boards.
- 90 – one cent coins
- 10 – five cent coins (for exchange)
- 18 – ten cent coins

18 Shopping Cards

11¢ – 19¢

.11 – .19

Money – Teen Board, 1¢., 5¢. and 10¢. coins w/Shopping Cards

Two sets of Teen Boards provide both cent symbols and decimal symbols for representing Money quantity. Plastic ten-cent, five-cent & one-cent coins are counted out in the same manner that ten bars and colored-bead bards are used with the Montessori math: the child must make the sets 11 – 19 with coins. The child creates the symbols 11¢ – 19¢, and .11 – .19 with the teen boards.

The Shopping Cards provide the child the opportunity to count out the correct coins for the Shopping Card. Marketplace relevance is immediately introduced!

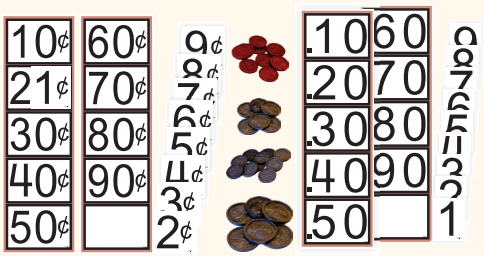

The ten-cent coin is the focus and base for building the teen quantities.

The Montessori linear counting materials (Number Rods, Numerals Number Rods & Numerals, Spindle Box, Numerals & Counters, Teen Board, Ten Board, Hundred Board), which so brilliantly provide children with a physical sense of quantity and sets, provides the strongest structure for introducing children to money. Our Montessori Money Curriculum tightly parallels the Montessori math sequence, giving a seamless learning experience for the child and ensuring that no mathematical concept is left unexamined. The child will equally explore linear counting, base ten, and the operations of addition and subtraction with money.

Money – Ten Board

2 sets of Ten Boards & Shopping Cards
- 1 set – with ¢ symbol
- 1 set – with decimal point

Plastic coins for both Ten Boards.
- 18 – one cent coins
- 10 – five cent coins (for exchange)
- 18 – ten cent coins
- 6 – twenty five cent coins (for exchange)

20 Shopping Cards

11¢ – 99¢

.11 – .99

Ten Board, 1¢, 5¢, 10¢ and 25¢ coins w/Shopping Cards

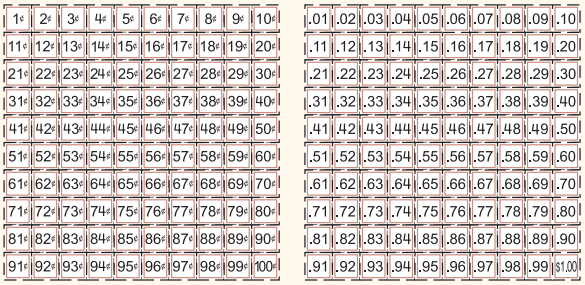

Two sets of Ten Boards provide both cent symbols and decimal symbols for representing Money quantity. Plastic ten-cent, five-cent & one-cent coins are counted out in the same manner that ten bars and colored-bead bards are used with the Montessori math: the child must make the sets 11 – 99 with coins. The child creates the symbols 11¢ – 99¢, and .11 – .99 with the ten boards.

The Shopping Cards provide the child the opportunity to count out the correct coins for the Shopping Card. Marketplace relevance is immediately introduced!

The twenty-five-cent coin is introduced.

Money – Ten Board

2 sets of Hundred Boards
- 1 set – with ¢ symbol
- 1 set – with decimal point

Money – Hundred Board

Two sets of Hundred Boards provide both cent symbols and decimal symbols for representing 1¢ – 100¢, and .01 – $1.00.

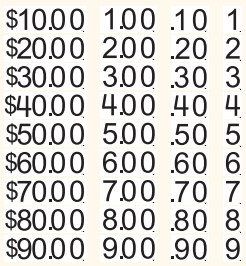

The child sequences the numerals 1¢ – 100¢, and .01 – $1.00.

The dollar symbol ($) is introduced.

Money – Decimal Numeral Cards & Coins

3 sets of Decimal Numeral Cards
- 1 set – large
- 1 set – small

45 – one cent coins
45 – ten cent coins
100 – one dollar bills
100 – ten dollar bills

Money Decimal Numeral Cards and Coins

All materials necessary to present the "Bird's Eye View" and the "Crisis of Nine" with Money using the same procedure as the Montessori golden bead material.

Coins are limited to one-cent & ten-cent coins, and dollars are limited to one-dollar and ten-dollars denominations.

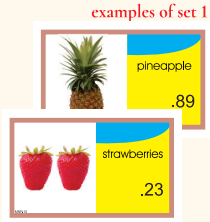

The one-dollar bill and the ten dollar bill are introduced.

Money – Product & Price Cards

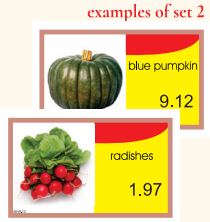

3 sets of Product & Price Cards
- set 1 – 32 cards – prices between .01 – .99
- set 2 – 32 cards – prices between $1.00 – $9.99
- set 3 – 32 cards – prices between $10.00 – $99.99

Use plastic coins from: MNP.07–.08–.09

examples of set 1

examples of set 2

examples of set 3

Shopping Cards – Three Sets

The Shopping Cards provide the child an opportunity to count out the correct bills and coins for the Shopping Card.

The child then moves to adding Shopping Cards together to obtain the sum.

Fractions Curriculum

The Fractions Curriculum cards are sold as a complete set.
Full Color • Printed on plastic • Ready to Cut
936 total Fraction cards • *Fractions Curriculum* manual inlcuded

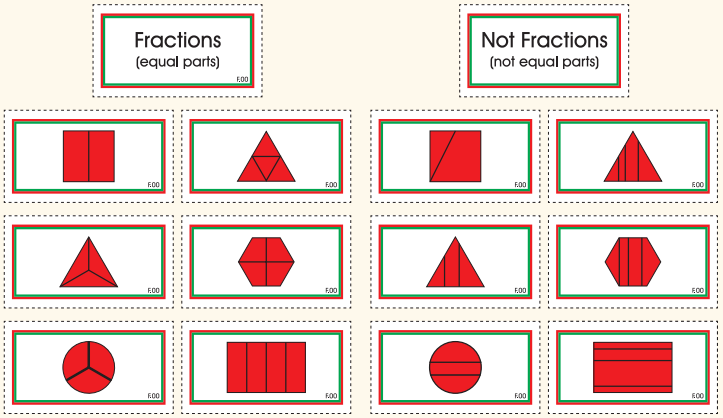

$162.00

F.00–F.13

Fraction Cards provides the curriculum structure and activities for the child to thoroughly experience all foundational concepts for understanding later fractional equivalencies.

Fractions: Equal Parts of a Whole

74 cards total

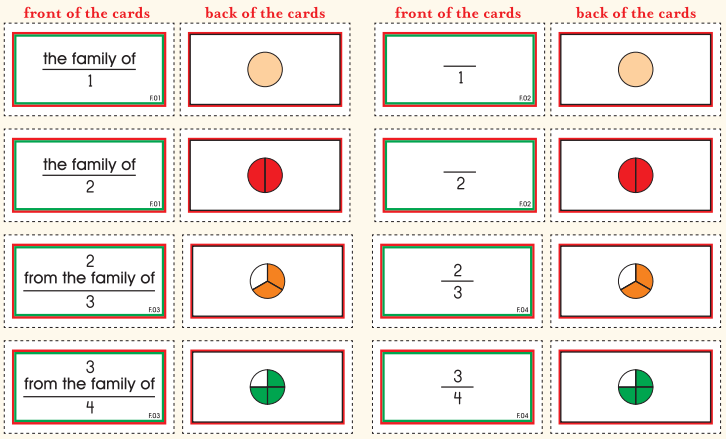

Examining circles, squares, rectangles, and hexagons divides into two parts that are equal, and not equal, the child determines if the shape is a fraction or not a fraction. The material continues with the same four shapes divided into three parts and four parts with the same task of determining fractionality, or not!

The definition of a fraction as a whole divided into equal parts is fully explored.

Denominator & Numerator use w/Fractions Skittles from 1–4

95 cards total

Families of Fractions 1 – 4 with Fraction Cones

Denominator is the focus as the child identifies among the fraction cones the correct "family".

Conventional Notation 1 – 4 with Fraction Cones

Conventional notation of a numeral below the line indicates the total fractional parts.

The Numerator: Members of the Family 1 – 4 with Fraction Cones

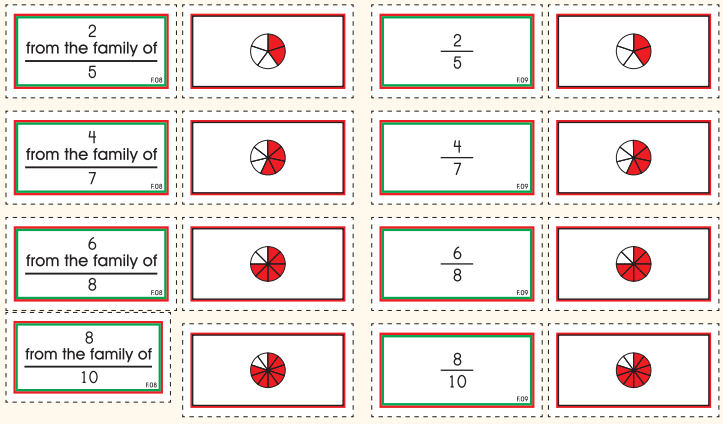

Numerator is the focus as the child identifies the number of fractional parts from the family.

The Numerator: Conventional Notation 1 – 4 with Fraction Cones

Conventional notation of a numeral above the line indicates the total fractional parts.

Denominator & Numerator 5 – 10 with Fraction Circles

113 cards total

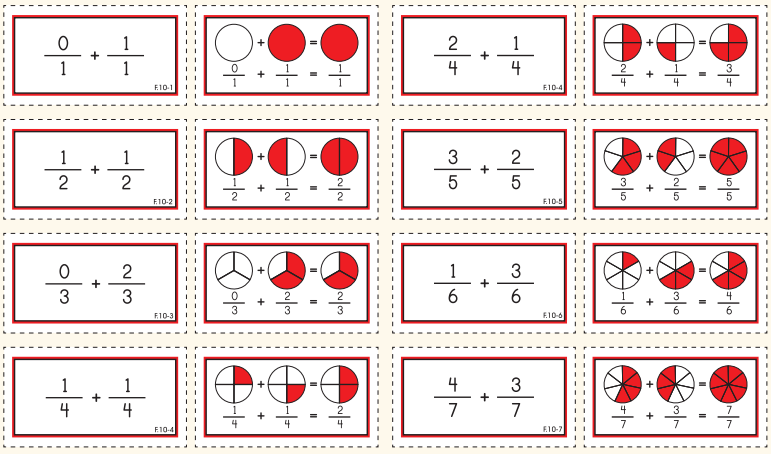

Following the same sequence as the 1 – 4 Fraction Cones, the Families are introduced with the Fraction Circles and then the possible Numerators. Presenting all of the possible options familiarizes the child with the fractions prior to adding and subtracting fractions (with the same denominator).

Fractions Curriculum

Addition with Fractions of the Same Denominator

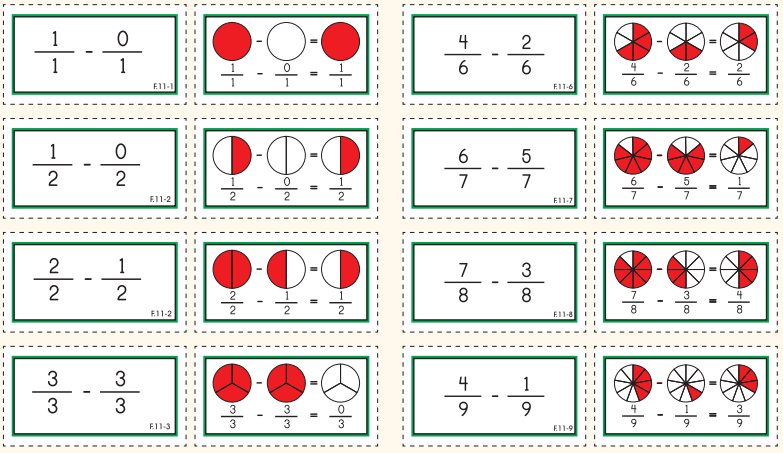

280 cards total (control of error on the back of each card)

All possible addition equations with denominators 1 – 10 are available in this material for the child to totally experience all addition options. Coding on each card allows the equations to be organized by the ten different denominators and control of error on the back of each card helps with self correction.

Subtraction with Fractions of the Same Denominator

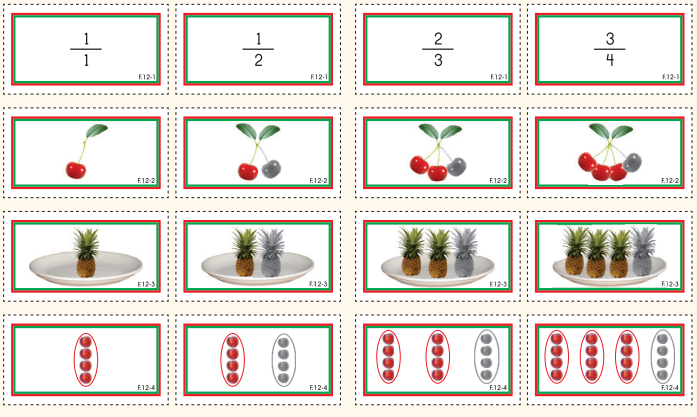

280 cards total (control of error on the back of each card)

All possible subtraction equations with denominators 1 – 10 are available in this material for the child to totally experience all subtraction options. Coding on each card allow the equations to be organized by the ten different denominators and control of error on the back of each card helps with self correction.

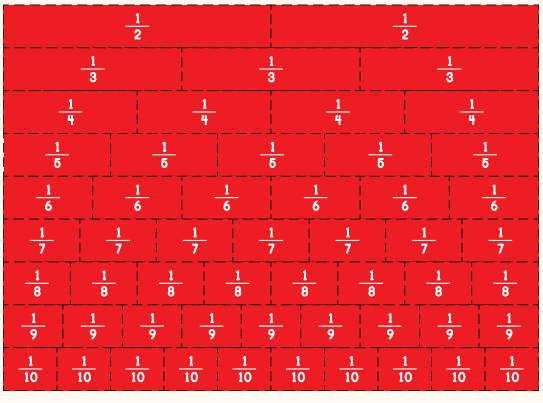

Parts of a Group,

40 cards total. Conceptual Expansion of Fraction to Group Fractions are considered as parts of a group. The curriculum considers fractions within this important context.

Equivalence with Linear Strips,

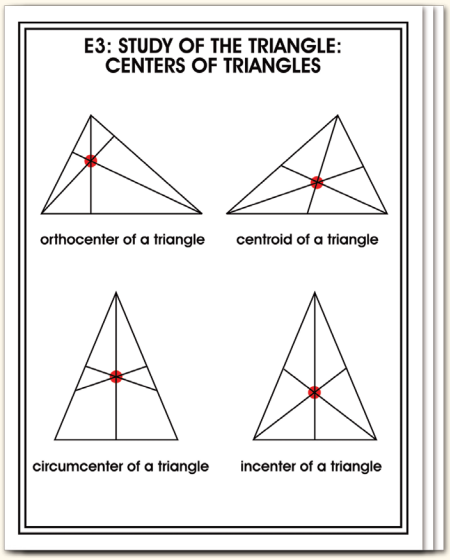

54 cards total. Through the manipulation of the linear strips the child discovers which fractions are equivalent to other fractions. The linear strips offer a parallel experience to the same research with the Fraction Insets Materials.

$1,042.00

30 Manuals Set
Includes a 15% discount

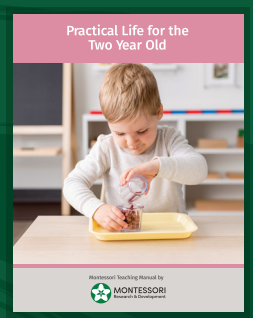

ME.B1	Botany Vol. 1	Living/nonliving, kingdoms, & nomenclature for the plant kingdom	$57.00
ME.B2	Botany Vol. 2	Plant physiology – structure and function – charts and experiments	$57.00
ME.BIO	Biology Manual 1	All Kingdoms analyzed by phyla, basic structure of cells, life cycles	$50.00
ME.CH	Chemistry Manual	Matter, it's properties and state, measurement, mixtures, elements, compounds, energy, chemical	$53.00
ME.D	Decimal Manual	Numeration and operations	$36.50
ME.F1	Fraction Manual Volume 1	Introduction, four operations, and equivalency	$33.00
ME.F2	Fraction Manual Volume 2	Operations with unlike denominators	$30.00
ME.FG	Functional Geography	Formation of the earth, solar energy, movement of the earth, atmosphere, work of the air, hydrosphere	$47.00
ME.G1	Geography Vol. 1	Physical and political geography, geography	$52.00
ME.G2	Geography Vol. 2	Geographical principles, land forms of continents, economic geography	$59.00
ME.GEO	Geology Manual	Life on earth, the formation of the earth, rocks and minerals, weathering and erosion, mass wasting, the work of water, glaciers, deserts, earthquakes, plate	$54.00
ME.GY1	Geometry Manual Volume 1	Geometry cabinet, constructive triangles, classified	$77.00
ME.GY2	Geometry Manual Volume 2	Construction of triangles & congruence, similarities, equivalency, Pythagorean Theorem	$83.00
ME.GY3	Geometry Manual Volume 3	Area, volume, measurement, & metric systems	$50.00
ME.H1	History Vol. 1	Notion of time, Age of Earth, Fundamental Needs, Clock of Eras	$52.00
ME.H2	History Vol. 2	Time Line of Life and People	$42.00
ME.H3	History Vol. 3	The Five Great Lessons, ancient man, ancient civilizations, US & California History	$47.00
ME.LA1	Language Arts Volume 1	Grammar, nine parts of speech	$53.00
ME.LA2	Language Arts Volume 2	Sentence analysis level 1 and 2, reading analysis	$28.00
ME.LA3	Language Arts Volume 3	Word study – root words, prefix, homophones, homonym, homograph, synonym, antonym	$39.00
ME.LA4	Language Arts Volume 4	Capitalization and punctuation marks	$41.00
ME.LA5	Language Arts Volume 5	Advanced grammar	$45.00
ME.M1	Mathematics Volume 1	Linear counting from red rods to long bead chains, decimal system from golden beads to bead frame, memorization of operations	$65.00
ME.M2	Mathematics Volume 2	Long bead frame, golden bead frame, checkerboard, test tube division	$36.00
ME.M3	Mathematics Volume 3	Decanomial, powers of numbers, multiples, divisibility, squaring, square root	$60.00
ME.M4	Mathematics Volume 4	binomial and trinomial multiplication and squares, preparing for square roots and long multiplication	$79.00
ME.M5	Mathematics Volume 5	Fractions, decimals, ratio, integers, and base systems, extending to cubing, cube roots, and algebra with Binomial and Trinomial Cubes	$68.00
ME.PH	Physics Manual	Buoyancy, gravity, inertia, simple mechanics, magnetism, electricity	$39.00
ME.Z1	Zoology Vol. 1	Living/nonliving, kingdoms, nomenclature of vertebrate & invertebrate	$45.00
ME.Z2	Zoology Vol. 2	Main characteristics of the vertebrates	$48.00
ME.CS	Elementary I & II Teaching Manuals – Complete Set	Complete set of Teaching Manuals for Lower and Upper Elementary (6–12)	$1 296.68
ME.CS1	Elementary I Teaching Manuals – Complete Set	Complete set of Elementary I Teaching Manuals	$826.20
ME.CS2	Elementary II Teaching Manuals – Complete Set	Complete set of Elementary I Teaching Manuals	$629.55
ME.PE	Plant Evolution	A journey through the captivating world of plant evolution	$75.00
